Real-time Farm Management

BarnWatch's unique design allows farm personnel to easily record and transmit daily production information to a central location.

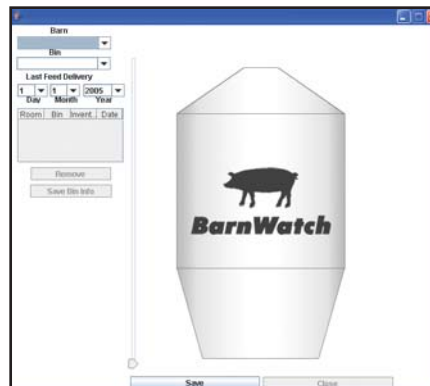

## MAIN MENU

With a simple click of the mouse farm staff can record key barn data such as the water meter reading, temps, death loss, and movements.

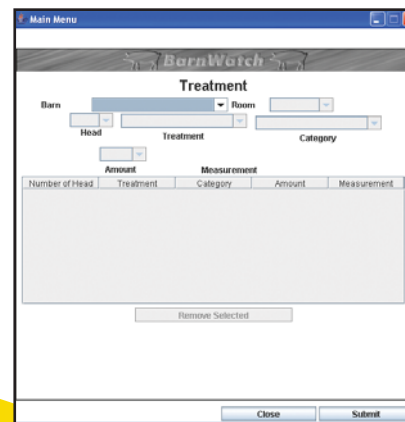

## BIN INVENTORIES

Confirmation of feed deliveries and bin inventories are now an EASY task....

## TREATMENTS

Daily treatment records keep management staff in the loop with heard health.

## WEB DATA

Communicating schedules and production information to farm staff has never been easier. BarnWatch can be configured to replicate your companies production web site. This priceless feature now extends your communication from the office, to your facilities.

Watching Production...Maximizing Profits
